HIRING PANEL REPORT

Marketing Analytics Intern at Northwind Foods

Riley Castellano
2026-10-20 · Final report

THE PANEL

4 of 7
would move you forward

4 yes · 2 unsure · 1 no

Each reviewer answered: should this resume move to the next step for this job?

SIMULATED SCREENING CHECK

90 → **90** / 100
Ready to send
Machine readability: Clean
Required terms: 5 of 6 found (1 only in your skills list)

Overall = 40% file readability + 40% job-keyword match + 20% content signals, rounded to steps of 5. Weights are our judgment, not calibrated to hiring outcomes.

TRUTH CHECK

0 invented facts
9 of 9 bullets trace to your resume or your answers.

A fresh Skeptic reviewer audited the rewrite against your own words.

Mode: 7 independent reviewers (Claude Code)

WHAT A RECRUITER SEES IN 7 SECONDS *"Business analytics student, marketing intern and shift lead, Excel and survey work."*

FIX BEFORE YOU SEND

- **A 300% sales claim with no baseline or method.** The 300% figure is out. The bullet now says what you did: you wrote the sale email.

BIGGEST WEAKNESSES, MOST SERIOUS FIRST TOP 5 OF 9

1. **SQL is required but only shows up as a class** MAJOR — Flagged by 1 of 7
   The posting asks for SQL experience. I see it in your coursework and skills list, but no line shows you using it…
   Real gap SQL stays labeled as class projects. A small project of your own that uses SQL would close this.

2. **Internship bullets describe duties, not results** MODERATE — Flagged by 3 of 7
   I can see what you were responsible for, not what changed because you did it.
   Fixed Bullets now say what you wrote, tracked and changed, using your own answers.

3. **The top third reads marketing, not analytics** MODERATE — Flagged by 2 of 7
   In a fast skim I see Marketing Intern and newsletter work first. The analytics side of you shows up later.
   Fixed The internship now opens with the weekly sales numbers work.

4. **Your closest match to this job sits low on the page** MODERATE — Flagged by 2 of 7
   The survey project is the most analytics-heavy thing here and it comes after two jobs.
   Fixed The survey project now sits right after Education.

5. **A 300% sales claim with no baseline or method** MAJOR — Flagged by 1 of 7
   300% compared to what, over what period, and what was your part? An interviewer will ask, and a vague answer hurts every other line.
   Fixed The 300% figure is out. The bullet now says what you did: you wrote the sale email.

WHAT CHANGED, WHAT NEEDS YOU, REAL GAPS

What we changed

7 bullets rewritten, sections reordered, 1 line cut.

- Cut: "Increased online sales by 300% during the summer sale"

Needs you

- **Experience: Tallgrass Outfitters:** Roughly what share of subscribers opened the weekly…
- **Required job terms are missing…** Re-check of the new resume: communication still not found.

Real gaps (not fixable by wording)

- **SQL is required but only shows up as a class.** SQL stays labeled as class projects. A small project of your own that uses SQL would close this.
- **Some job terms are only listed, not shown in your experience.** VLOOKUP is now in a work bullet. SQL stays in Skills because you used it only in class.

Next steps: 1. Read the new resume line by line and fix anything that is not exactly true. 2. Fill in what 'Needs you' lists, then save a fresh PDF.

THE PANEL

REVIEWER	VERDICT	MOVE FORWARD?	IN ONE LINE
Automated Screening Check Machine readability and job keywords	Strong yes	Yes	The file parses cleanly and most required terms are there; communication is the missing one.
Hiring Manager Proof you can do this job	Lean yes	Yes	The survey project and the Excel work earn a call; SQL beyond a class is the open question.
Recruiter The fast first skim	Lean yes	Yes	Clean and easy to skim; the top third says marketing more than analytics.
Competing Applicant Side by side with a strong applicant	Borderline	Unsure	Your survey project is a real edge, but it is buried and SQL is only listed.
CEO Business outcomes and ownership	Borderline	Unsure	I see useful work, but not yet what changed for the business because of you.
Future Teammate Day-one usefulness on the team	Lean yes	Yes	I could hand you an Excel task next sprint; SQL and dashboards would need some ramp-up.
Skeptic Claims that must survive a probe	Lean no	No	The 300% sales line will not survive one follow-up question; the rest holds up.

Verdict: how each reviewer rates the resume through their own lens. Move forward: whether they would pass it on.
